Cookies Dreamind uses

Many jurisdictions require or recommend that website operators disclose the types of cookies they use and occasionally get consent from users before placing certain cookies.

We may use any of the following categories of cookies on our website as detailed below. Each cookie falls within one of these four categories:

Category	Description
Essential Cookies	Essential cookies (first-party cookies) are sometimes called “strictly necessary” as without them we cannot provide many services that you need on the website. For example, essential cookies help remember your preferences as you move around the website.
Analytics Cookies	These cookies track information about website visits so we can make improvements and report our performance. For example, we analyze visitor and user behavior to provide more relevant content or suggest certain activities. These cookies collect information about how visitors use the website, which site the user came from, the number of each user’s visits, and how long a user stays on the website. We might also use analytics cookies to test new ads, pages, or features to see how users react to them.
Targeting or Advertising Cookies	These third-party cookies are placed by third-party advertising platforms or networks in order to deliver ads and track ad performance, enabling advertising networks to deliver ads that may be relevant to you based upon your activities (this is sometimes called behavioral, tracking, or targeted advertising) on the website. They may subsequently use information about your visit to show you ads that you may be interested on our website and other websites. For example, these cookies remember which browsers have visited the website.
